

Westinghouse 301

Project Profile Sheet

Owner: PG&E National Energy Group
Location: Bowling Green, Ohio
Owners Engineer: ESI Engineering
Output: 30 MW
Time Line: April 2000 to September 2000
Scope:

Installation of a W301 Westinghouse Combustion Turbine Generator with SCR and associated equipment. The facility was dismantled in Philadelphia and relocated to Bowling Green, Ohio. This included match marking, packaging, electrical, piping, mechanical and start-up support. TTS Construction self performed a majority of the work.

- Project Keys:**
- Relocated equipment
 - Fast Track Schedule
 - Installation of GE Fame 5 on the same site
